

Oyster Lean Roadmap

- June, 2018 -

Oyster is not just file storage on the tangle, but also an alternative revenue stream for website owners, while creating a decentralized meshnet for connectivity and Javascript based operations. One of our ultimate goals is to become the very first asset in the world that is pegged to something tangible (storage) in a completely decentralized way, while also freeing the internet from intrusive ads and moving the control of the webexperience back to the user. Oyster is the new paradigm of the internet economy.

**"The world is your oyster.
It's up to you to find the pearls."**

Chris Gardner, *The Pursuit of Happyness*
